

## Yan Ji

DLI Doctoral Fellow

### Biography

Yan Ji is pursuing her PhD in Computer Science at Cornell University under the supervision of Prof. Ari Juels. Her research interest focuses on blockchain scalability, research ethics and legal compliance. In particular, her research aims to design efficient and secure blockchain protocols, and concurrently introduce and examine principles for conducting ethical blockchain research. In the future, she plans to provide guidelines for ethical blockchain research and design new frameworks of legal compliance and infringement prevention for blockchain applications.
